Want to know more?

EnviroFence ATLAS™ is a rapidly deployable 2.4m high temporary fencing system for low to medium security level applications. Utilising a profiled V-mesh panel, ATLAS™ comes with multiple support and security toppings options making it the most versatile and easy to install system on the market.

Standard pedestrian load options are 0.36kN/m and 0.74kN/m, plus maximum wind for the location and includes a site-specific design pack. Engineered to eliminate the common issues of 'Heras' style fencing making ATLAS™ the next generation in temporary fencing.

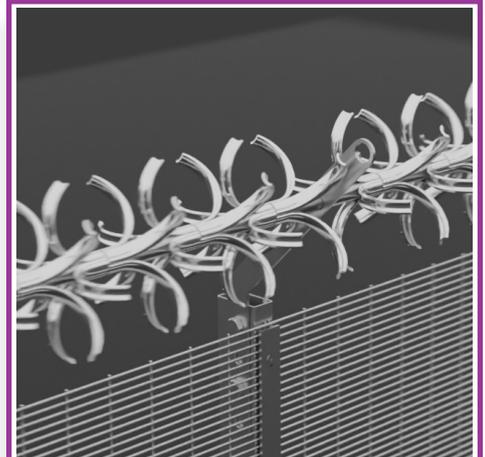

SYSTEM FEATURES

Fully Adjustable Post

V-Mesh Profile Panel

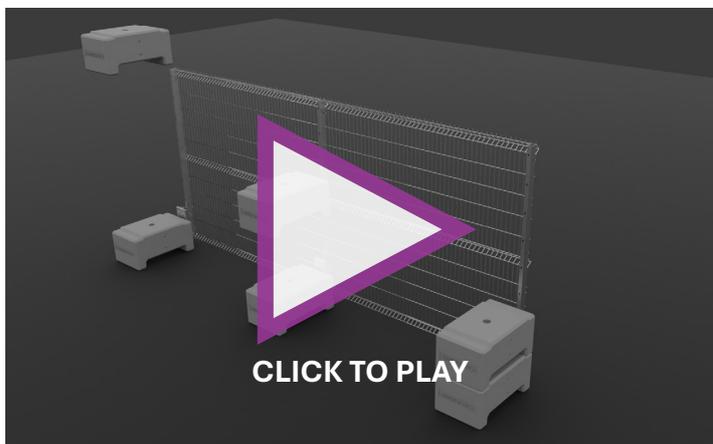

Optional Security Toppings

EnviroFence ATLAS™

UK's First Net Zero Verified Temporary Fencing System

WATCH PRODUCT VIDEO

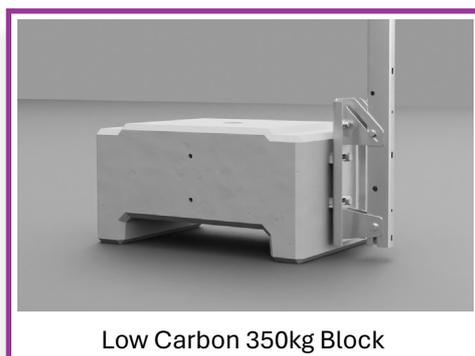

We are so confident in our patent-pending EnviroFence™ range that we have created a series of product videos to showcase each systems unique design features.

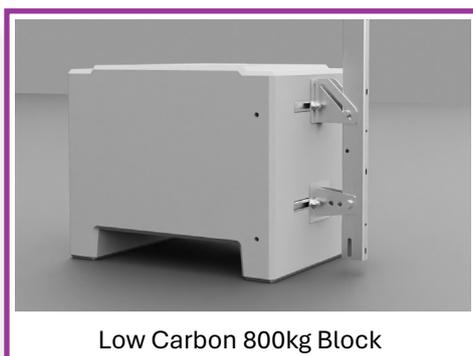

At the heart of the system is its interoperability with our market leading net zero verified EnviroHoard™ system. Utilising key components offers unrivalled operational and commercial benefits.

Pictures are good, but nothing beats watching a video, click to watch 40 seconds of next generation temporary fencing.

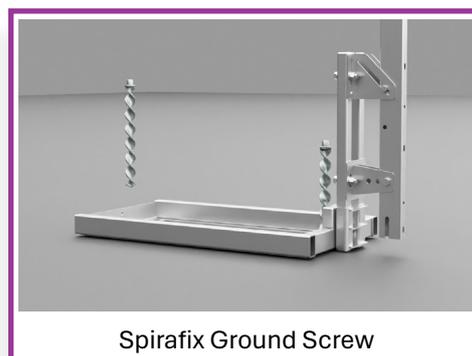

SUPPORT OPTIONS

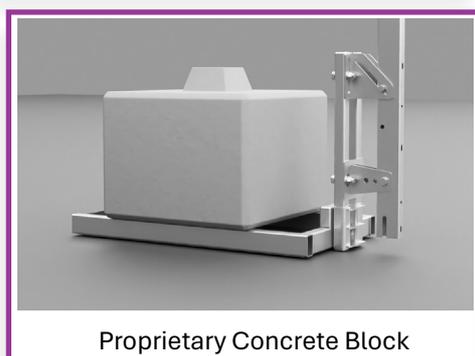

Low Carbon 350kg Block

Low Carbon 800kg Block

Spirafix Ground Screw

Proprietary Concrete Block

Water IBC

Proprietary Weights 50kg
